

Aaron Macken – Full Stack Web Developer

Contact Info

Email: Aaron.A.Macken@gmail.com

Github: <https://github.com/AaronMacken>

LinkedIn: <https://www.linkedin.com/in/aaronmacken/>

A full stack developer that uses primarily React and Redux on the front end, and Mongo DB with Node on the back end. A self-driven learner with a passion for all things web, front to back.

Snapshot of Skills

HTML5 / SASS / CSS3

React / Redux

Node / Express

Vanilla JS / jQuery

Mongo DB

Building REST API

Debugging

SQL

Node Package Manager

Sample Projects

Project: <http://inkcity.herokuapp.com/>

Github: <https://github.com/AaronMacken/INK-City-Website>

- ❖ Created a social media website similar to Pinterest for tattoo lovers using Mongo, Express and Node. The site pulls in tattoo posts from Instagram using a **third-party API**. Users can sign up, modify their profile and manage a friends list.

Project: <http://pomotron9000.herokuapp.com/>

Github: <https://github.com/AaronMacken/Pomotron-Singlepage>

- ❖ Developed a productivity application using Mongo DB, Express and Node. The application makes use of **AJAX** to prevent the flow of the DOM from being disrupted.

Education

Associate in Technology – General

Pierce College, WA

August, 2017

Bachelors of Science in Software

Development (In Progress)

Bellevue University, NE

July, 2020
